Summary

Mid-Level Full-Stack Developer focused on critical enterprise systems, .NET APIs, high-volume SQL Server and legacy modernization. Work spans production diagnosis through UI delivery, with attention to performance, data integrity and deadlines.

Education

Centro Universitario Fundacao Santo Andre
Bachelor's Degree in Information Systems

Santo Andre, SP
2019 – 2023

Experience

DevPartner

Sao Paulo, SP (Hybrid)
Nov 2025 – Present

Mid-Level Full-Stack Developer

- Optimized the billing system from 1 to 100+ transactions per minute through T-SQL query rewrites, index review, batch processing and SQL Server bottleneck removal.
- Maintain critical production routines in C#, ASP.NET Web API and SQL Server, modeling Stored Procedures, Views, Functions and Triggers with focus on performance, atomicity and traceability.
- Execute migrations and bulk operations on tables with 500k+ records, validating integrity, consistency and monthly closing impact.
- Design asynchronous processing with Workers and Windows Services, applying queues, decoupling and resilience as the flow requires.
- Deliver end-to-end features for admin dashboards and customer portals with .NET, SQL Server, React/TypeScript and AngularJS, with pagination and async handling for slow operations.
- Support technical decisions with stakeholders and POs, translating business rules into APIs, queries, reports and acceptance criteria; use agentic AI tools, always with validation, for debugging, tests and refactoring.

DevPartner

Sao Paulo, SP (Hybrid)
Nov 2023 – Nov 2025

Junior .NET Developer

- Implemented business rules in C#, ASP.NET Web Forms, VB.NET and SQL Server for incentive, logistics and points platforms, including monthly budget per client and dealer rankings.
- Created and maintained Stored Procedures, Views, Functions and export routines used daily by business and operations teams.
- Modernized legacy components by connecting React/AngularJS interfaces to existing APIs and workflows, reducing rework for internal users.
- Investigated production bugs, data inconsistencies and performance issues, from SQL diagnosis through functional validation.

Projects

3DSort

github.com/SalustLab/3DSort

- Built an open-source desktop app (50+ stars, 400+ downloads) in Python to reorganize the Nintendo 3DS menu from a PC, solving a long-standing problem in the 3DS homebrew community.
- Ensured integrity with automatic backups and SHA-256 checks on NAND writes; 153 tests and cross-platform CI/CD.

Salustian Creative Labs

salustiancreativelabs.dev

- End-to-end portfolio with Next.js/Astro, React, TypeScript and Tailwind CSS; PT/EN i18n and Lighthouse 96+.

Skills & Languages

Core strengths: C#, .NET, ASP.NET Core/Web API, .NET Framework, REST APIs, SQL Server, T-SQL, Stored Procedures, performance tuning, React, TypeScript.

Hands-on experience: ASP.NET Web Forms, VB.NET, AngularJS, Worker/Windows Services, EF Core, Git, Azure DevOps.

Familiarity: RabbitMQ, Kafka, Docker, Redis, Azure/AWS, JWT/OAuth, DDD, SOLID, unit testing, CI/CD.

Languages: Advanced English (Cambridge B2 First Certificate, 2020); Native Portuguese.
